

## Vegetation Debris Disposal Area Use Policy and Rules

The Vegetation Debris Disposal Area is available to all Lockwood Folly property owners, including LFCC. Yard debris including grass clippings, leaves, pine cones, shrub trimmings, twigs, branches and tree limbs may be placed in the Disposal Area. The Disposal Area is divided into two areas, facing the area: (a) the left side is for leaves, grass clippings, pine cones, shrub trimmings and twigs; (b) the right side is for whole shrubs and larger tree trimmings, including branches and tree limbs. If the POA contractor has to sort the debris it increases our cost of disposal.

The Vegetation Debris Disposal Area may be used by both property owners and landscape contractors hired by property owners, but only for yard debris removed from the property owners property. However, the Disposal Area is **NOT** to be used by outside contractors clearing whole trees from a Lockwood Folly property.

If the yard debris is “bagged” for transportation to the Disposal Area, all plastic bags and packing material must be removed when depositing the yard debris.
