The POA Board would like to update to the Lockwood Folly community on the status of Pool House construction.

Pouring of the concrete foundation was completed September 18. Brunswick County inspected and approved the foundation and under slab plumbing. Framing began in September.

Structural steel for the second-floor beams was delivered and installed October 13.

The framer began working on the second-floor support system, installing trusses. Flooring for the second floor was completed the week of October 19.

We appreciate the community's cooperation with construction activity. Necessary deliveries and activities by Pinnacle Southeast Contracting Group affect vehicle circulation. At times construction activity restrains access to the pool. We appreciate the community's tolerance of the necessary disruptions.

POA Board of Directors
